

What is a Virtual session and what is included in it:

In a Virtual session, we make a video call, and I will walk you through the best lighting and styling the space, camera angles and what to have in frame. It's like I'm the photographer and you are my assistant. When we're happy with what we got, you switch to the camera app and take the shot.

After our session, I will provide you with a link where you will upload all the photos from your phone. All of them will go through color correction, some clean up and small retouching where I see fit. You will receive them all a couple of days later.

What is included in this virtual photo session?

- Up to 30 edited, low-resolution images.
- 15-minute pre-session meeting (video call) so I can get to know you and your place, check the best spots with natural lighting within your home, and understand your expectations. We will also test the phone and camera app so that we minimize any technology issues during our session.
- 1-hour photo session.

Investment: \$150

You can find more details about it on my website [here](#).

And you can see some of the photos from my previous Virtual sessions [here](#).
